GigitekAI Logo Usage Guide

Brand Guidelines & Best Practices

Introduction

The GigitekAI logo is the cornerstone of our brand identity. This guide ensures consistent, professional use of the logo across all digital and print media. Proper logo usage strengthens brand recognition and maintains visual consistency.

Logo Variants

Three primary logo variants are available for different contexts. Each variant is optimized for specific use cases:

Variant	Dimensions	Use Case	Format
Horizontal	245×70 px	Navbar, headers, horizontal layouts	PNG (transparent)
Vertical	200×200 px	Sidebar, footer, mobile, social media	PNG (transparent)
Icon-Only	128×128 px	Favicon, badges, buttons, app icons	PNG (transparent)

Sizing Guidelines

Context	Variant	Recommended Size	Min Width	Max Width
Navbar	Horizontal	160px	100px	180px
Footer	Horizontal	140px	100px	180px
Sidebar	Vertical	120px	80px	150px
Mobile	Vertical	100px	60px	120px
Icon/Badge	Icon	48px	32px	64px

Background Compatibility

Dark Backgrounds (Recommended): Use the transparent PNG logo on dark navy, black, or deep blue backgrounds. The white and cyan colors provide excellent contrast and visibility.

Light Backgrounds: The transparent PNG works on light backgrounds as well. Ensure sufficient contrast between the logo and background color.

Print Media: For print applications, use the white-background JPG format or request a vector SVG for highest quality.

Common Mistakes to Avoid

1. Stretching or Distorting: Never stretch or compress the logo. Always maintain the original aspect ratio.

2. Rotating: Do not rotate the logo. Use it only in its original horizontal orientation.

3. Adding Effects: Avoid adding drop shadows, glows, or other effects beyond the standard hover state.

4. Changing Colors: Never change the logo colors. Use only the official cyan (#00D4FF) and white.

5. Using Low-Resolution: Always use the highest resolution version available. Never downscale below 100px width.

6. Placing on Busy Backgrounds: Ensure the logo has sufficient clear space and contrast with the background.

Brand Color Palette

Color	Hex Code	RGB	Usage
Primary Cyan	#00D4FF	RGB(0, 212, 255)	Logo, accents, hover states
White	#FFFFFF	RGB(255, 255, 255)	Logo text, highlights
Navy-Black	#0A0E1A	RGB(10, 14, 26)	Background, primary canvas

Available File Formats

PNG (Recommended for Web): Transparent background, web-optimized, supports all three variants.

JPG (Legacy): White background, use only for legacy systems or print fallback.

ICO: 32×32 favicon for browser tabs and bookmarks.
